Drift Pendant 30"

ALLIED MAKER

CEI-184

DESCRIPTION

The Drift Pendant is a large-diameter statement piece defined by a smooth, aerodynamic taper that flows from the hang tube down into the center of the fixture. This continuous curve creates a refined transition and a distinctly streamlined silhouette, giving the form a sense of motion and ease. At its core, the spun form resolves into a precisely machined solid aluminum body, wrapped in hardwood veneer to introduce warmth and material contrast. This central element anchors the piece before giving way to a hand-slumped glass diffuser below. The generously scaled diffuser emits an even, ambient light, casting a soft, warm glow that enhances the pendant's calm, cohesive presence.
